

Engagement details

Engagement started from	: 2015
Active (as on 2016)	: Yes
Agreement	: Local
Specific	: India
Team Worked	: India

Project details

MosChip Semiconductor Technology is the only semiconductor service company with extensive design experience in markets such as aerospace and defense, consumer electronics, audio and video, networking and telecommunications, mobile electronics, security, and software development. MosChip is a full service design facility and can take a design from concept to final product. Our customer driven approach focuses on all facets of the product development process, including not only technology, but also time-to-market and return on investment (ROI).

The company's product development experience with SoC devices, connectivity, software, and systems engineering allows MosChip to be able to meet even the most complex hardware and software design challenges.

With a large pool of engineers segmented into teams with multiple engineering disciplines, MosChip can deliver ASIC, firmware, drivers, boards, and platform solutions.

We have delivered successfully for the following technologies:

Application Development Technologies

Mobile Apps Technologies

Design Services

Infrastructure and Networking Technologies

Software Testing Services
